

Geospatial Programs in Higher Education: Lessons Learned and Resources Leveraged by Current NSF-ATE Projects

October 28, 2015

Mike Rudibaugh, Ph.D.

GST Instructor

Kaskaskia College

mike.rudibaugh@gmail.com

217-234-5244

PI NSF-ATE Project Geospatial

Advantage

DUE# 1304531

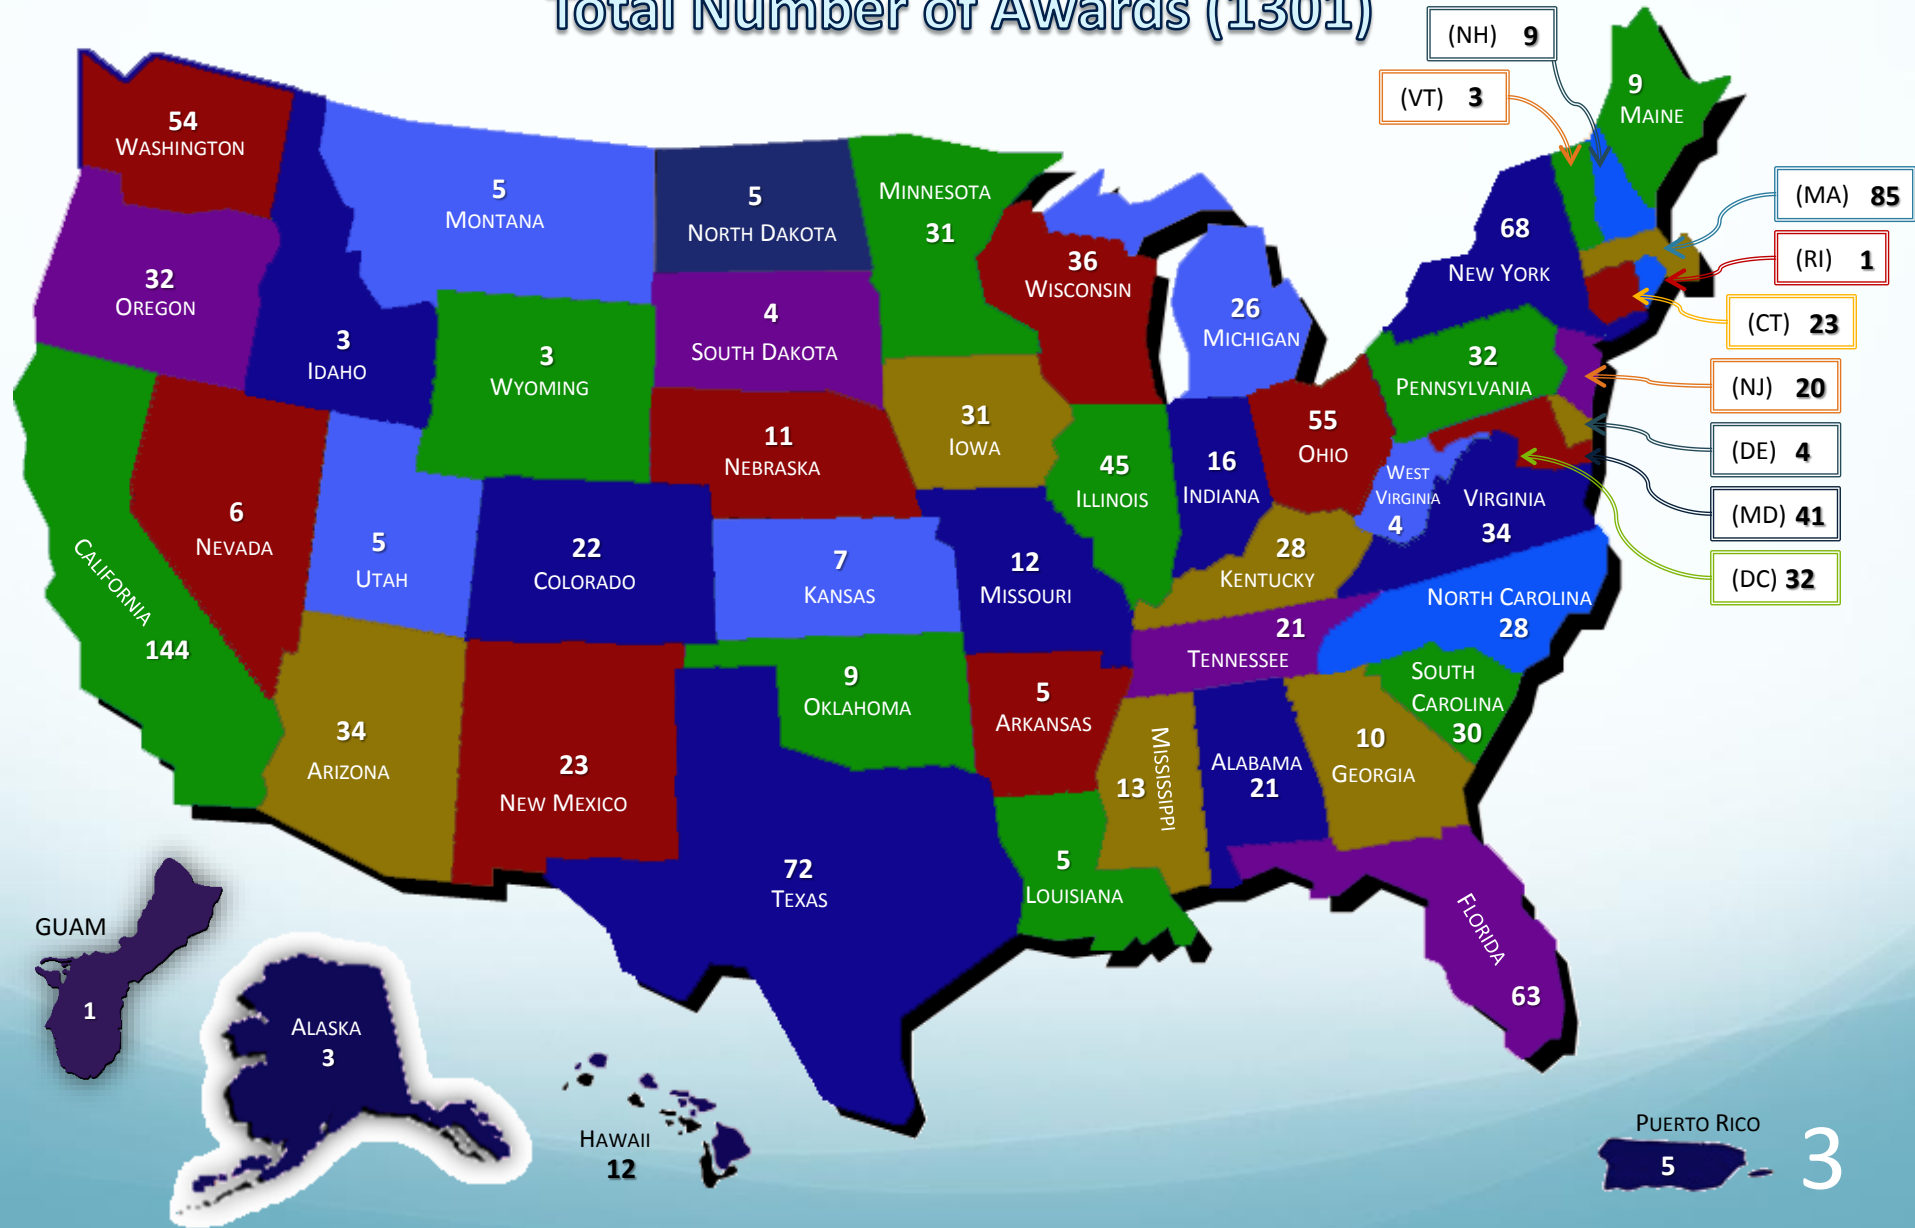

Advanced Technological Education Program (ATE)

- The education of highly qualified science and engineering technicians for advanced-technology fields that drive the nation's economy.
 - **Community colleges** have leadership roles on all projects.
 - Grades 7-12, 2yr- and 4-yr institutions can be supported. (**Pathways**)
 - **Partnerships** with Industry and Economic Development Entities

Number of Awards per State in ATE's 20 Year History

Total Number of Awards (1301)

ATE Program Tracks

- **Projects** (up to \$300,000 /yr, 3yrs.)
 - Program Development, Implementation and Improvement;
 - Professional Development for Educators;
 - Curriculum and Educational Materials Development;
 - Teacher Preparation;
 - **Small Grants for Institutions New to the ATE Program (\$200K,3yrs);**
 - Coordination Networks (ATE-CN) (up to \$200,000/yr., 4 yr.)
- **Centers National, Regional, Support** (\$1.6M-4M, 3-5 yrs.)
- **Targeted Research on Technician Education** (Planning, Exploratory, Full-Scale; \$150,000-\$800,000, 2-3 yrs.)

ATE Program Funding Rate

Program Overall: 20% (flat-funding)

Small, New to ATE: 60-70%

----consider the odds

Issues of a Strong Proposal

- **Great problem facing STEM Education and Development**
 - Updating or modernizing curriculum
 - Strengthening ties with unmet needs for technicians in your regional economy with local industry
 - Forming partnerships with other educational institutions in developing K-16 career pathways
- **Building a strong team!**
 - **Principal Investigator (PI) – Faculty Lead (Reporting)**
 - **Co-Principal Investigator (Co-PI) – Faculty (Targeted Issues)**
 - **Administrative Lead – Key administrator directing the link back to college resources and departments**
 - **External Evaluator – Outside independent agency or group to verify the completion and work on the grant for the NSF in the form of a report documenting success with grant outcomes and objectives.**
 - **Internal Evaluator (optional) – Someone internal to organization to assist the team with gathering internal data for the external evaluator (i.e., surveys, data collection on student and classes, ect...).**
 - **Marketing (optional) – Someone to assist the team with developing and managing the project website and running any social media to connect the project to outside partners (dissemination).**

Grant Team

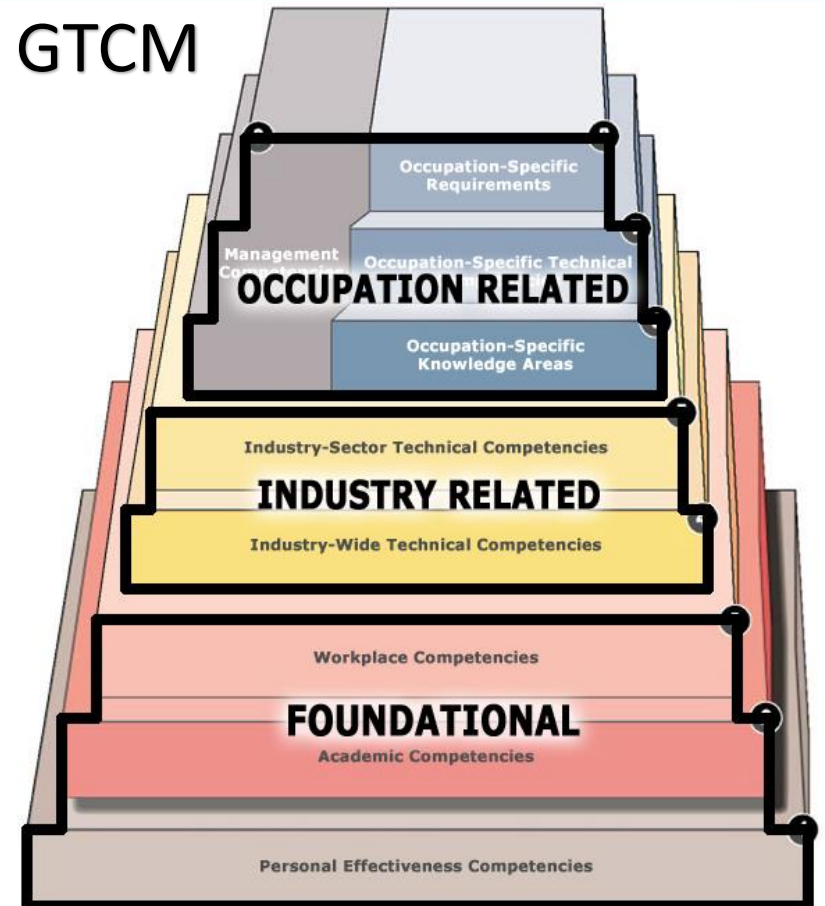

Mike Rudibaugh, PI	Bruce Fink, Co-PI	Art Borum (GST Program Director)	Dr. Greg Labyak	Elaine Craft External Evaluator	Jeffery Ebel Internal Evaluator
GST Adjunct Faculty – KC	Chair of Life Science Department (Faculty-KC)	Director of Industrial & Continuing Education - KC	Vice-President of Instructional Services – KC	Co-PI for the SC ATE National Resource Center for Expanding Excellence in Technician Education	Dean of Institutional Effectiveness - KC
Curriculum development, professional development with teachers, and supervise interns with regional employers	Coordinates GST STEM integration with college and high school faculty	Coordinates grant outreach special events and GST Advisory Board for KC	Administrative oversight on grant work, budgets, and college resources	Gathers data and results to confirm grant objectives and goals are being met or not relating to the funded proposal	Gathers data, survey, and institutional information needed by external evaluator

National Science Foundation (NSF) – The Geospatial Technology Advantage: Preparing GST Technicians and GST-Enabled Graduates for Southern Illinois Business and Industry

Goals

- Establish Certificate/Associate Degree Program in GST
 - Leveraged GeoTech resources and products as a partner in our proposal
- Provide GST field internships with regional employers
 - Leverage regional advisory board
- Incorporate GST into STEM programs at KC and regional high schools
- Conduct outreach events

GeoTech GTCM

Grant Challenges and Opportunities

Challenges

- Institutional Awareness
 - Educational
 - Administrative
 - Student
- Technical
 - Access
- Cost
 - High cost and low enrollment programs

Opportunities

- Industry demand is growing
 - More paid internship opportunities than students in programs
- Cross-disciplinary nature to be both a stand-alone and a supporting certificate program for numerous STEM fields
- Growth of geospatial programs at universities
 - Career pathway

ATE Grant Resources

Geospatial Advantage

Grant Resources

Grant Website Resources:

Kaskaskia College Geospatial Technology

What are Geospatial Technologies?

Kaskaskia College's Geospatial Technology program supports a field that uses graphic information systems (GIS) and global positioning systems (GPS) to capture, store, and analyze data.

Geospatial Technicians then use that information to help businesses answer questions to build business strategies for future success!

Fields Employing GST Technicians:

- Business
- Defense & Intelligence
- Education
- Engineering
- Government
- Health & Human Services
- Mapping & Charting Natural Resources
- Public Safety
- Transportation
- Utilities & Communication

Northern Utah Geospatial Technology Education Program (NUGeoTec)
**Geospatial Programs in Higher Education: Lessons Learned
and Resources Leveraged by Current NSF-ATE Projects**

Eric C. Ewert, PhD, Weber State University, GeoTECH Webinar, Oct. 2015
Co-PI: Michael Hernandez, PhD

The NUGTEP development project is funded
through a NSF-ATE DUE-1304888 grant.

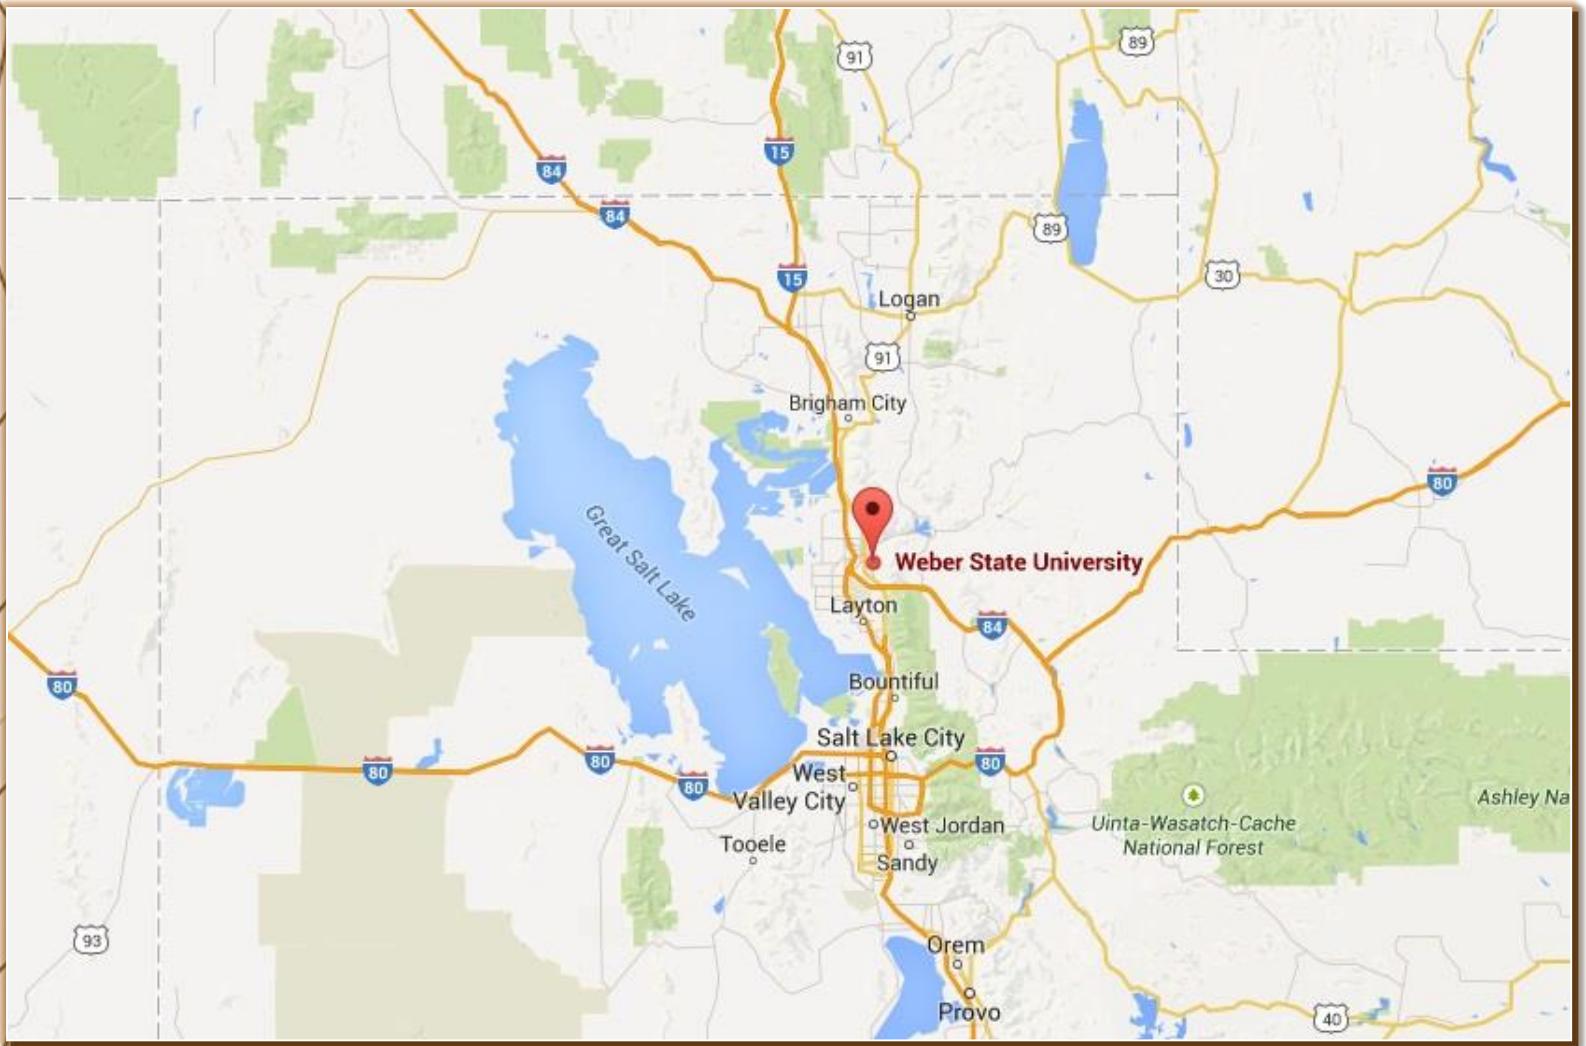

WEBER STATE UNIVERSITY

Worthy of Your Dreams

About WSU: 126-year-old, 24,000 student public university offering 250 Certificate and Degree Programs, and 11 Graduate Degrees as part of its Dual Mission (2 and 4-year)

Located primarily in Ogden, Utah, WSU serves northern Utah and parts of adjacent states.

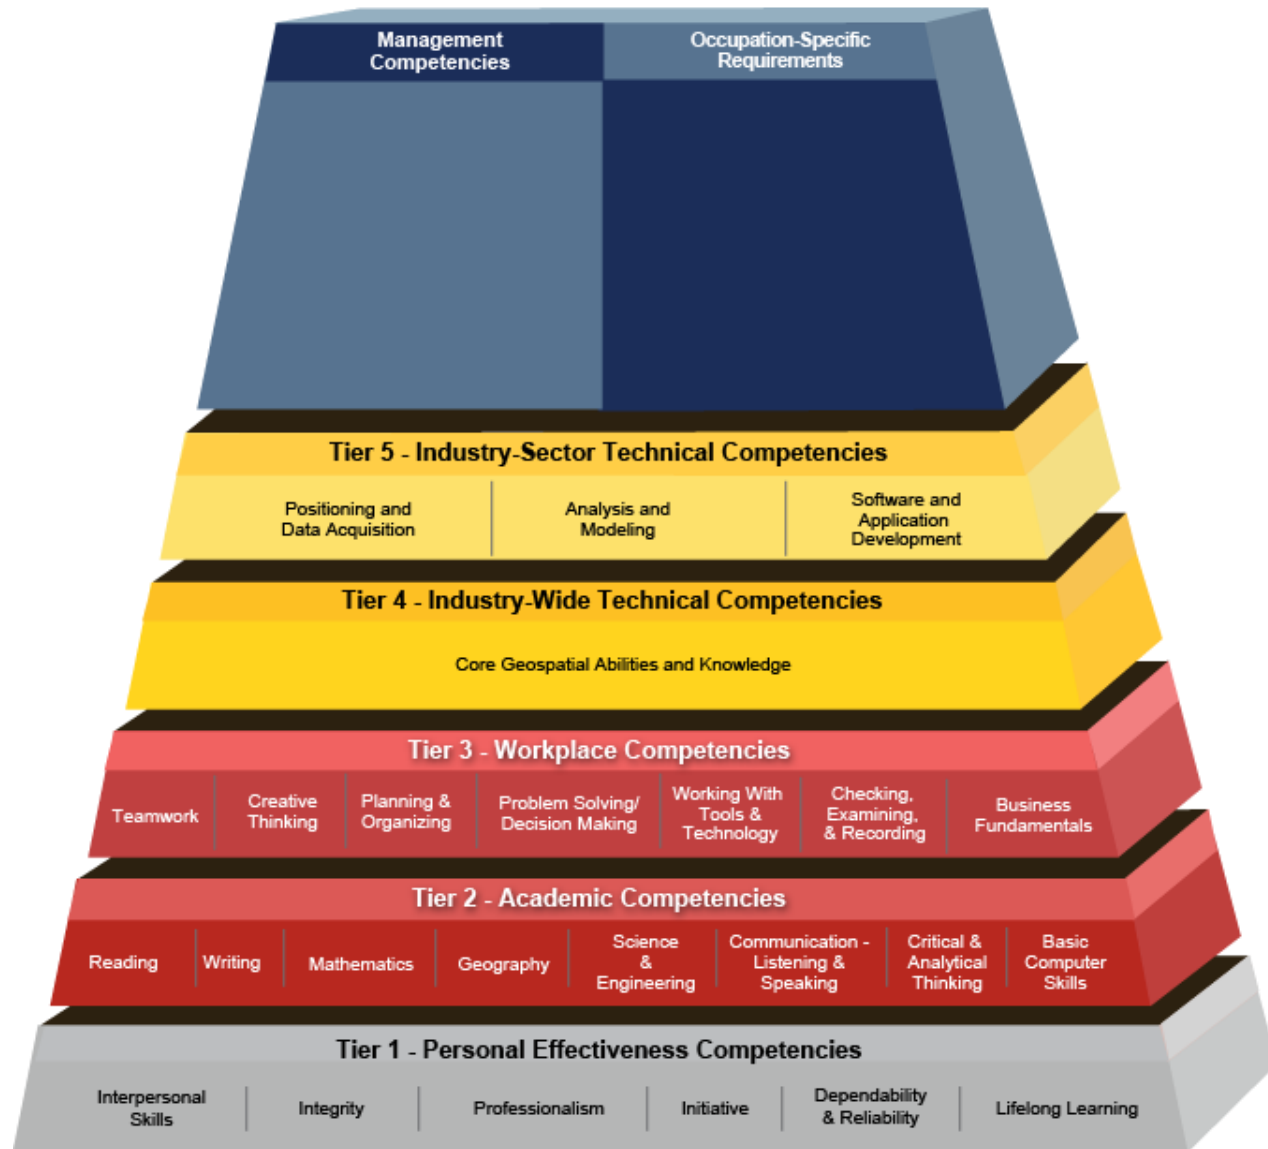

NUGeoTec Objectives

- Develop a Geospatial Training Program
- Make it Two-tiered: Technician & Analyst
- Be Guided by the Geospatial Technology Competency Model (U.S. Dept. Labor)
- Use the Best Practices as Compiled by the National GeoTECH Center (Louisville, Kentucky)
- Assemble a Geospatial Advisory Board
- Administer a Workforce Needs Survey
- Build Appropriate Curriculum
- Offer Classes and Evaluate

Demographic Information

Note:

GIS/Geospatial **TECHNICIANS** may also have the following job titles: Engineering Tech
CAD Tech, Survey Tech, GIS Specialist, Cartographer, GIS Coordinator, Planner I/Tech, Technical Support Specialist.

GIS/Geospatial **ANALYSTS** may also have the following job titles: Geospatial Analyst, GIS Data Specialist, GIS Specialist, GIS Mapping Assistant,
GIS Application Specialist, Planner II, Planner III, Engineering Aide

5. Please enter the number of GIS/Geospatial Technicians and Analysts currently employed in your organization.

Total number of GIS/Geospatial **TECHNICIANS**:

Total number of GIS/Geospatial **ANALYSTS**:

6. Select all the minimum education levels for your current GIS\Geospatial **TECHNICIANS and **ANALYSTS**:**

	High School with GIS experience	Vocational/Technical School	2-year Community College: GIS-focused degree	2-year Community College: non-GIS degree	4-year College/University Degree: GIS-focused major	4-year College/University Degree: non-GIS major
GIS Technician	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
GIS Analyst	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Other (please specify)

7. Select the minimum education level required by your organization if hiring an entry-level GIS TECHNICIAN and GIS ANALYST

	High School with GIS experience	Vocational/Technical School	2-year Community College: GIS-focused degree	2-year Community College: non-GIS degree	4-year College/University: GIS-focused major	4-year College/University: non-GIS major
GIS Technician	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
GIS Analysts	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Other (please specify)

Survey Summary

Northern Utah Geospatial Technology Workforce Needs Assessment– Survey Highlights:

Nineteen (19) Organizations participated in the preliminary survey were from State, Federal, and Private Sectors working in northern Utah.

ENTRY-LEVEL GIS/GEOSPATIAL TECHNICIANS

Participants have hired GIS/Geospatial technicians with these education levels:

- High School with some GIS
- Vocational/Technical School
- 2-year and 4-year colleges with non-GIS majors
- 2-year and 4-year colleges with GIS majors
- None have military as only education

Participants in the future, would hire ONLY entry-level GIS/Geospatial technicians with 2-year community college or 4-year college/university GIS-focused major.

Top three technical skills needed:

- Maintaining good credible data and having established effective review processes built into their work Or recognize when one needs to be established
- Proficiency in creating good maps that display information
- Basic understanding of how GIS can be integrated with other programs used

Current skills/proficiencies that will INCREASE five to ten years in the future:

- COGO Legal descriptions
- Perform data conversions
- Georeference data
- Create scripts
- Create charts
- Create tables
- Archive/retrieve data

New skills that will be NEEDED when entering the job market five to ten years from now:

- A physical relationship and understanding of what they are truly doing.
- Mobile GIS
- Some application development/programming
- Internet mapping skills
- Some database administration and programming

Basic programming/language/software skills you expect entry-level GIS Technicians to have at time of hire: Java, Basic model builder, attribute field calculations

ENTRY-LEVEL GIS/GEOSPATIAL ANALYSTS

Participants have hired GIS/Geospatial Analysts with these education levels:

- 4-year College/University with non-GIS majors and GIS majors

Participants in the future, would hire ONLY GIS/Geospatial Analysts with 4-year College/university with non-GIS majors and GIS majors

Top Three Technical Characteristics/Competencies:

- ArcGIS/ESRI experience
- Data management skills
- Desire to seek out data

Skills/proficiencies that will INCREASE five to ten years in the future:

- Research available data
- Purchase new data
- Develop databases
- Define feature behaviors
- Determine data conversions
- QA/QC data
- Perform image analysis
- Develop a data maintenance
- Develop GIS procedures
- Create models
- Pre-process data
- Conduct Geoprocessing
- Generate statistics
- Interpret results
- Define user software needs
- Determine applications
- Enhance existing customers applications
- Establish data custodianship
- Organize file structure
- Train GIS end-user(s)
- Coordinate GIS projects
- Represent GIS at meetings
- Supervise interns
- Develop project timelines/schedules
- Acquire professional credentials
- Review job related resources

GIS/Geospatial Analysts will need some database administration and program skills when entering the job market five to ten years from now.

COURSE OBJECTIVES

This exploratory course introduces you to the fundamental concepts of geospatial science and how geospatial technologies are used to solve real-world problems across both space and time. You will learn the basic techniques of mapping, GPS (global satellite navigation system or GNSS), GIS (Geographic Information Systems), spatial analysis, cartography, and remote sensing. Geospatial science incorporates powerful tools and

NUGeoTec

WEBER STATE UNIVERSITY
Worthy of Your Dreams

NUGeoTec

What is NUGeoTec?

Weber State University, with support from the National Science Foundation, is developing the Northern Utah Geospatial Technology Education Program (NUGeoTec).

Geospatial Technology includes :

- Geographic Information Systems (GIS)
- Remote Sensing (airborne and satellite imagery)
- Computer Cartography (digital mapmaking)
- Global Positioning and Navigation Systems (e.g., GPS).

There is great demand for these skills among employers nationwide. WSU has a unique dual role mission as the regional community college for much of northern Utah and also as a large, public, comprehensive university. NUGeoTec will prepare post-secondary students for successful employment in the rapidly growing geospatial workforce, and will also create advanced educational opportunities for people with existing training and experience in the geospatial technologies fields. These goals will be achieved by developing a new Certificate and a related Associate Degree in Geospatial Technology (Community College Tier) and updating the existing Certificate and Minor in Geospatial Analysis at WSU (University Tier). A local advisory board (comprised of university, industry, government, and community leaders) is assisting in the development of these programs, guided by the U.S. Department of Labor Geospatial Technology Competency Model and the best practices recommendations compiled by the national GeoTech Center. NUGeoTec is expected to serve a broad and growing group of students, educators, and employers in northern Utah.

Remotely sensed images are widely available and have countless potential applications. However, analyzing these images used to be a difficult and expensive process. Now, Esri's ArcGIS 10.x with Image Analysis extension provides tools that can be used by novice and experienced ArcGIS users alike. In this manual, we provide a series of easy-to-understand tutorials to guide you through image analysis processes. By

Geospatial Service Learning Course

NASA GIS 195 Service Learning in GIS at NASA Langley

Announcements

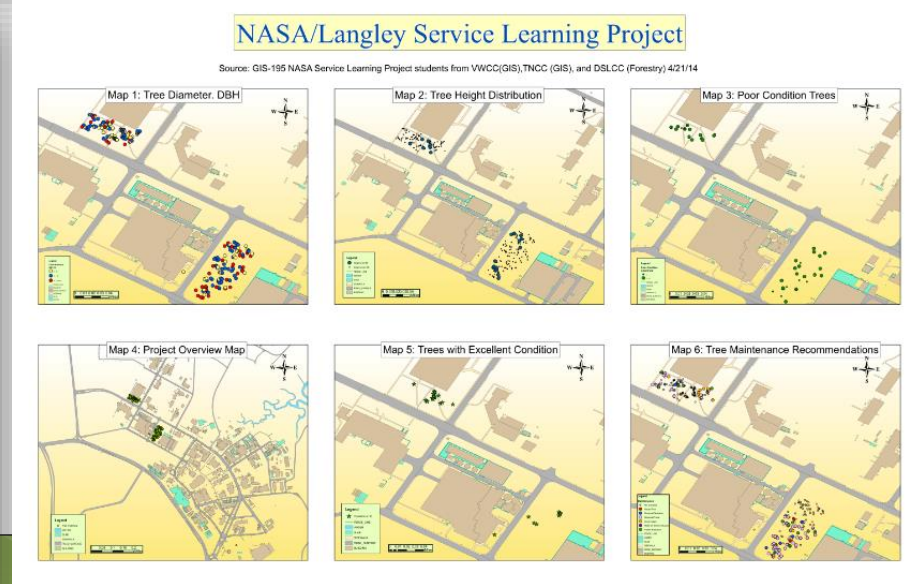

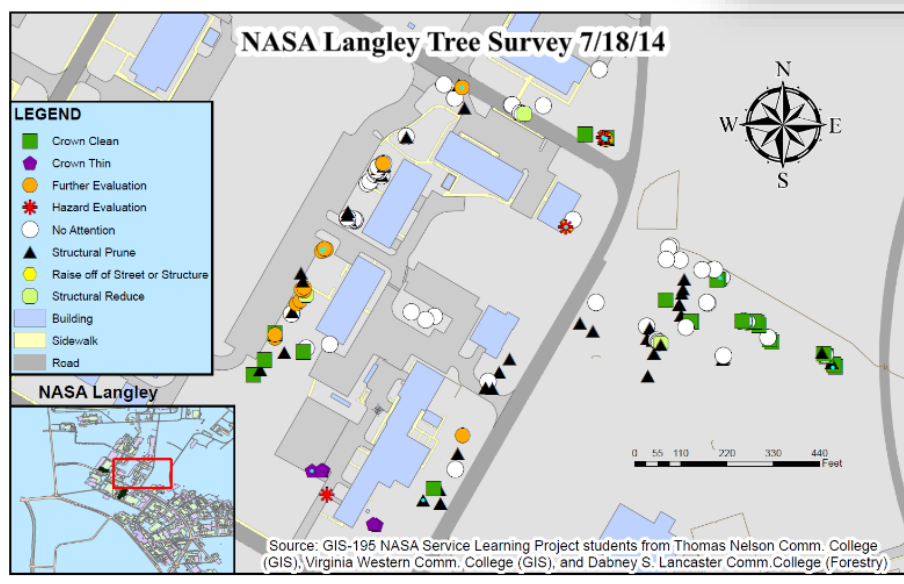

Week 5
Posted on Monday, July 14, 2014 9:07:24 PM EDT

Couple more things to review before the field trip:

- Go to the Weekly Activities folder and review the directions for Week 5. You will
 - Review the Final Report and Maps from the Spring Service Learning class.
 - Download the ArcGIS files for these maps. (Once, open in ArcMap and familiarize yourselves with them. We will be using those documents as a basis for the work we do this week.

Fieldwork is this week! What to do to get ready for our trip this Thursday. In a nutshell:

Most important: Complete the **Photo Release** form and the **Assumption of Risk** form and sign them. Scan and e-mail to David Webb by Wednesday morning, sooner if you can. If you do not have

Geospatial Service Learning Course-NASA Wallops Island, 2016

STEM TAKES FLIGHT
at Virginia's Community Colleges

SERVICE LEARNING COURSE OPPORTUNITY AT NASA WALLOPS ISLAND

HELP NASA INVESTIGATE SEA LEVEL RISE AND INVASIVE SPECIES

Thomas Nelson Community College is offering a three-credit Sea Level Rise Service Learning course. All expenses paid for course tuition and four days of fieldwork including travel, lodging, and food! Open to Virginia community college. Competitive application process, students from all disciplines are encouraged to apply. Sponsored by Virginia Space Grant Consortium (VSGC) and offered through the STEM Takes Flight Program in partnership with NASA Wallops Flight Facility and Thomas Nelson Community College.

GIS 295 - Topics in Service Learning in GIS.

This online course contains four days of outdoor fieldwork at NASA Wallops on Virginia's Eastern Shore. Field work will likely be completed over a weekend (Thursday-Sunday) in April 2016.

Faculty-led student teams will engage with NASA scientists to tackle the issue of sea level rise, invasive species and their impact on coastal communities and ecosystems including NASA Wallops. Using GIS, global positioning system (GPS), unmanned aircraft systems, and other technologies students will model various sea level rise scenarios and gauge their impacts to NASA infrastructure and habitats. Students will compare data with existing datasets and develop a report to be presented to NASA staff.

Application: <https://www.surveymonkey.com/r/9HXDL88>

Application Due Date: December 1, 2015

Notification of acceptance by December 5

<http://www.vsgc.edu/STEMtakesFlight/sealevelrise.html>

During the course you will

- Learn about service learning.
- How to use and operate an Unmanned Aircraft Systems (UAS) to collect data
- Develop or acquire geographic information system GIS skills in analyzing data collected with a UAS. (Prior GIS knowledge is not a pre-requisite for this cross-discipline course)
- Learn about remote sensing and how to use regular imagery, near infrared imagery and Lidar to answer questions using a GIS.
- Help NASA solve a problem, work side-by-side with NASA scientists
- Gain real world experience collecting and analyzing data
- Tour the facilities and observe the research being completed at the site.
